

CROSS STITCH

1. You will need: a piece of binca/material, scissors, different coloured wool, safety needle (or a blunt needle)

2. Decide on your design, we decided on a flower but you could sew your initials or just a pattern and then thread your needle

3. Start from one corner or where you want to put your first cross stitch and continue to with your pattern. Use different colour wool for contrast.

4. Make sure you tie the ends of the wool at the back of the binca/material.

5. Continue with your design.....tie off your last bit of wool and your cross stitch design is complete!
